June 2024

We are always amazed when June arrives how fast the year has gone! May and June are very busy months. However they bring an opportunity to reflect on the year and consider how we might work together to build on our strengths at PPS, and create space for conversations around what we may need to start, stop, and continue. It is the time to bring closure to one school year and look towards the possibilities of the next.

Our BTPS Assurance Plan continues to guide our decisions as we move into the upcoming school year. Priority One of our Assurance Plan focusses on supporting learning success for all students. Keeping this priority in mind, on May 27th our division two teachers engaged in learning sessions around the implementation of the new science curriculum. On June 10, 11, and 18th our BTPS Innovation coaches will be working side by side with many of our teachers, aligning long range and unit planning with Alberta curriculum.

With declining enrollment and weighted moving average, there are financial impacts that need to be considered as we planned for the upcoming school years. You are able to review the budget framework on our school website. As we move into the upcoming weeks, we will share programming with our school community. This week, our highschool students will begin to register for courses for the 2024/25 school year.

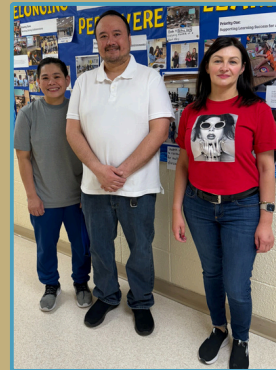

PPS athletes have had a successful track and field sesason. Check out the Provost Public School Athletics Page on Social Media.

Wishing each of you a safe and memorable summer!  
Mrs. Brouwer and Ms. Heim
